⇒ Who is The Digital Operational Resilience Act (DORA)

The Digital Operational Resilience Act (**DORA**) is the **new European legislation** aiming at all firms' need to make sure they can withstand, respond to and recover from all types of ICT-related disruptions and threats. These requirements are homogenous across all EU member states.

DORA aims to ensure that all participants in the financial system have the necessary safeguards in place to mitigate cyber-attacks and other risks. The legislation will require firms to ensure that they can withstand all types of ICT-related disruptions and threats.

⇒ When Will DORA Be Enforce and When Will Firms Have to Implement It?

The Council of the European Union and the European Parliament (the legislative bodies responsible for approving EU laws) formally adopted the DORA in November 2022. Financial entities and third-party ICT service providers have until January 17, 2025, to comply with DORA before enforcement starts. However, there is disagreement on the implementation timeline for resilience testing requirements, (The European Parliament asks for a 36-month period, Council in favor of 24 months). We believe that firms should use a working assumption of a 24-month implementation period for all the DORA's requirements.

⇒ How can Advanced Vision IT help you with your IT Compliance needs?

Our team can help your IT operations to become compliant. We can help you manage the three important components of your IT environment - People, Processes and Technologies.

- IT Strategy and Project Management.
- IT Security & Risk Mitigation.
- Network and Server management.
- Cloud Migration and Management.
- Software vulnerabilities and upgrades.
- Data Protection and Backup Management.
- Disaster Recovery Management.
- Performance monitoring and reporting.
- Security monitoring and reporting.
- Creating Policies and Procedures.
- IT Automation.
